

ABHIRAMI S A

OBJECTIVE

To enhance my professional skills, capabilities and knowledge in an organization which recognizes the value of hard work and trusts me with responsibilities and challenges.

EXPERIENCE

◦ Flytxt

17/06/2019 - Present

Software Developer

- Customisation of product according to client requirements
- Researching, designing, implementing and managing software programs
- Testing and evaluating new programs
- Writing and implementing efficient code
- Working closely with other developers

◦ Keltron

11/06/18 - 21/06/18

Intern

Basics of Embedded Systems
Arduino microcontroller

EDUCATION

◦ Sree Chitra Thirunal College of Engineering

2015 - 2019

Bachelor of Technology in Electronics and Communication
GPA 7.59

◦ Arya Central School, CBSE

2015

Higher Secondary Education
92%

◦ Arya Central School, CBSE

2013

Senior Secondary Education
GPA 10

ACHIEVEMENTS & AWARDS

- Individual Champion of annual sports meet of SCT (2015, 2016)

SKILLS

- Python
- MySQL
- Linux
- HTML5
- Docker
- Flask
- Microsoft Office
- CSS
- Team Player
- Communication

INTERESTS

- Art and Craft
- Books
- Badminton
- Movies

REFERENCE

- Winner of Fresher's Badminton Tournament of SCT (2017)
- Shortlisted for the Hero nation wide idea pitching competition (2019)

ACTIVITIES

- Member of Sahridhaya, a non profit organization (2018 - present)
- Sponsorship Head for Cult A Way, the techno cultural fest of SCT (2019)
- NSS volunteer (2015 - 2017)

PROJECTS

- **Bell Circuit**

A bell circuit was designed using two 555 ICs which produces a ding dong sound.

- **Room Automation for Paralysed People**

The project delineates the design and development of an eye-tracking based home automation system that provides the targeted locked-in patient with the ability to control appliances using his/her eyes. In the developed system, eye movement, pupil position, size and velocity are determined using a built-in laptop camera in conjunction with a series of algorithms coded in Python. The camera is adjusted in such a way so as to be leveled horizontally with the eye-sight of the patient. Further algorithms are to allow the user to control and move the mouse cursor with his/her eye movements. A specially designed graphical interface provides the individual with the options as to what he/she wishes to control.
